

Mineral tiles for any
area of application

OWAlifetime collection

OWA

In this brochure you will find a selection of the most common mineral tiles in our OWAlifetime collection. Hygiene ceilings and moisture resistant ceilings can be found in the separate brochure no. 9898 e. A complete overview of the OWAlifetime collection can be found in our price list no. 9001 e. Here you will also find independent fire protection units and other tiles for special areas of use. All of the latest price lists, brochures, tender specifications and technical information can be found at: www.owa-ceilings.com, category Service/Downloads.

The illustrations, technical characteristics, functions and other information in this document have been compiled to the best of our knowledge and are up-to-date. However, only the most important information can be presented. These are to be regarded as general and cannot be applied to individual cases. We therefore recommend that you contact our experts at OWAconsult in a specific case. They are pleased to serve you as competent partners.

All illustrations are reduced in size. They show the complete tile in original size. It is possible that they differ from reality. Please note that they are only similar. Please make your final decision based on an original sample of the tile.

We reserve the right to make technical changes to all products. Furthermore, our general terms of sale, delivery and payment apply.

OWA mineral tiles are made in Germany and stand for highest quality and performance in connection with sound insulation, sound level reduction and fire safety. They are available in many surfaces and different installation systems, and are therefore suitable for ceiling systems in offices and call centres as well as in restaurants, hospitals, hotels, shops, stadiums or educational establishments.

OWAcoustic premium

Mineral tiles of the OWAcoustic premium range meet highest standards of design and function. The tiles are differentiated by their look, and by the differences in their functions. With them, you fulfil not only many construction-related requirements, but also any acoustic requirements.

OWAcoustic smart

OWAcoustic smart mineral tiles meet all the standard requirements, provide reliable fire protection and are convincing due to their low weight.

Special tasks

The high-quality ceilings in our OWAcoustic premium product line form the basis for a large range of special ceilings. Besides functions like fire protection, room acoustics and sound reduction, several of our products also have special characteristics that qualify them for hygienic areas as well as cleanrooms and humid rooms. You can find these special ceiling tiles in our brochure no. 9898 e.

Thermal conductivity factor	$\lambda = 0,055 \text{ W/mK}$ in accordance with EN 12664	
Light reflection	78 % to 91 %, depending on surface	
Resistance to fire	Requirements for the total load-bearing building component: Soffit and suspended ceilings, resistance to fire 30 - 180 min. (REI 30 - REI 180).* Requirement of the sub-ceiling alone: independent fire protection unit (from the top and bottom), fire resistance of 30 min. (EI 30).*	
Sound insulation	Against sound transmission via the ceiling void: sound reduction of 25 dB to 49 dB.* For noise reduction and regulation of the reverberation time: average sound absorption of 15 % to 95 %.	
Montage	Careful assembly and suitable working conditions are required for a perfectly installed ceiling. Recommendations: To comply with Construction Products Regulation (CPR) for assemblies, only use construction components from the OWAconstruct programme – the correct profiles and individual elements are provided for every installation situation. Please check to ensure the following before installing an OWA ceiling: - dry rooms - completed plastering, screed and wet and installation work - already installed and glazed windows and doors - connected heating system that can be put into operation if need be Additional information for „renovations“ for example can be found in OWA Installation Guide no. 9801 e.

Simply convincing and all-round applicability

Sinfonia

OWAcoustic premium Sinfonia was developed in order to work in a wide-ranging operational field. The tiles are suitable for acoustically sensitive areas. Offices, conference rooms, auditoria and lecture halls, just as for operational areas, in which it depends on good design and strict fire protection, e. g. corridors, entrance areas and foyers within public and commercial sectors.
